What if someone at school is infected with COVID-19?

1. Positive COVID-19 case reported to school administration.
2. School administration will notify the Director of Youth Health Services and School Safety Officer.
3. The Director of Youth Health Services and School Safety Officer will conduct an in-school investigation, gather facts, and additional information.
4. Information will be shared with the Department of Public Health.
5. The Department of Public Health will determine quarantine and isolation periods for impacted students and staff.
6. Parents/Guardians of students who are identified by the Department of Public Health as needing to quarantine will be notified by phone and letter.
7. Parents of impacted student may receive a follow-up phone call from the Department of Public Health.

*These guidelines are provided by the Department of Public Health on what schools need to do if a student or staff member tests positive for Covid-19. Guidelines are subject to change based on guidance from the Department of Public Health.*
